## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-34, drawn to a transmitting and receiving device, which multiplexes video and other data at varying data rates, classified in class 725, subclass 60.
- II. Claims 35-69, drawn to a recording and playback device which records a first and second data stream and stores the streams on separate data partitions, classified in class 386, subclass 98.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I does not require the recording and storage of the second data stream and placing the first and second data streams in separate partitions. The subcombination has separate utility such as it enables for the recording and playback of the second data stream.
